

Unauthorized Increase Charge, Version 2

Effective: 05/20/2014

This Business Practice describes how an **Unauthorized Increase Charge**¹ (UIC) is calculated and billed. Examples are provided below using scenarios that illustrate the application of this Business Practice.

Version 2 of this Business Practice is revised to reflect comparing schedule(s) to reservation(s) by **POR**² to **POD**³ path.

A. Billing of the UIC Amount

A UIC will be issued on the transmission bill when a schedule or schedules exceed the reservation capacity rights on a Point-of-Receipt (POR) to Point-of-Delivery (POD) path, as described in the UIC provisions in the 2014 Transmission Rate Schedule, or its successor rate schedule.

B. Requesting Waiver or Reduction of the UIC Amount

1. A written request for a waiver or reduction of a UIC may be submitted to your Transmission Account Executive. The request must include all of the information necessary to demonstrate that it satisfies the criteria for a waiver or reduction as described in Section G.3., "UIC Relief," of the 2014 Transmission Rate Schedule, or its successor rate schedule.
2. The customer should make best efforts to submit a written request for a waiver to its Transmission Account Executive within 60 days after receipt of the transmission bill with

¹Transmission Customers taking Point-to-Point Transmission Service under the PTP, IS, and IM Rate Schedules shall be assessed the UIC when they exceed their capacity reservations at any Point of Receipt (POR) or Point of Delivery (POD). Transmission Customers taking Network Integration Transmission Service under the NT Rate Schedule shall be assessed the UIC if their Actual Customer-Served Load (CSL) is less than their Declared CSL. BPA-TS will notify a Transmission Customer that is subject to a UIC once BPA-TS has verified the UIC amount.

²Point of Receipt is an interconnection on the Transmission Provider's Transmission System where capacity and energy will be made available by the Delivering Party; An OASIS field on a TSR that is the scheduling POR.

³Point of Delivery is a point on the The Transmission Provider's Transmission System where capacity and energy transmitted by the Provider will be made available to the Receiving Part; An OASIS field on a TSR that is the scheduling POD.

the UIC charge. Upon receipt of a waiver request, BPA Transmission Services will evaluate and decide whether to grant the waiver within 60 days.

3. If a waiver or reduction is granted, BPA **Customer**¹ Billing will issue the Customer an appropriate credit as soon as practicable.

C. Example

During an hour, there are two reservations: 1) one reservation is for 200 MW on a path of POR of BPAPOWER to the POD of NWH respectively, and 2) during the same hour, a second reservation is for 100 MW for the same POR to POD combination of BPAPOWER to NWH respectively. The total is 300 MW on this path. The sum of schedules on this path during the same hour is 310 MW. This results in a UIC.
